EDUCATION

The Hong Kong Polytechnic University

Ph.D. in Computer Science

Hong Kong, China

Sep 2021 – Present

- **Advisor:** Prof. Maggie Wenjie Li
- **Research Interests:** Conversational AI, Emotional Support Conversations, Medical Consultation Dialogues

Peking University

B.S. in Computer Science

Beijing, China

Sep 2016– June 2020

- **Advisor:** Associate Prof. Sujian
- **Research Interests:** Chinese Discourse Parsing, Question Generation

University of Oxford

Exchange Students, Summer Program

Oxford, United Kingdom

July 2018 – Aug 2018

PUBLICATIONS

RESEARCH EXPERIENCES

Towards Emotional Support Conversation Systems with Goal Awareness | Ph.D. Student

Advisor: Prof. Maggie Wenjie Li, Department of Computing, The Hong Kong Polytechnic University

Sep 2021 – Present

- Proposed a support strategy planning algorithm with lookahead heuristics to estimate the long-term effects of the adopted strategy on the user.
- Designed a dialogue framework, COOPER, which coordinates multiple specialized agents to collectively work towards a complex dialogue goal (e.g., emotional support, persuasion).
- Proposed a lightweight approach to avoid generating toxic content by manipulating the information flow within the attention layers of the language model during inference.
- Contributed to three first-author papers published at EMNLP 2022, EMNLP 2023, and AAAI 2023.

Constructing Interpretable Medical Consultation Systems | Research Intern

Advisor: Dr. Yefeng Zheng, Tencent Jarvis Research Center

Feb 2021 – Dec 2021

- Constructed the first large-scale entity-centric medical consultation dialogue dataset, MedDG.
- Proposed an interpretable medical consultation system by mimicking human doctors' inquiry logics.
- Won the 1st Prize for "the Competition at 21st China National Conference on Computational Linguistics: Automated Medical Diagnosis Systems" in 2021.
- Contributed to two first-author papers published at NLPCC 2022 and IJCAI 2022.

Difficulty Controllable Question Generation | Research Assistant

Advisor: Assistant Prof. Bang Liu, University of Montreal

June 2021 – January 2021

- Defined question difficulty as the number of inference steps required to answer it and proposed a framework that progressively increases the question difficulty through step-by-step rewriting.
- Contributed to a first-author paper published at ACL 2021.

Chinese Discourse Dependency Parsing | Research Assistant

Advisor: Associate Prof. Sujian Li, Institute of Computational Linguistics, Peking University

Sep 2018 – June 2020

- Proposed a zero-shot approach to conduct Chinese discourse dependency parsing via cross-lingual mapping.
- Explored the feasibility of unifying discourse resources with the dependency discourse framework.
- Contributed to two first-author paper published at DSNLGL 2019 and CCL 2021.

PROFESSIONAL ACTIVITIES

Challenge Organizer

- Organized the ICLR 2021 Challenge: Machine Learning for Preventing and Combating Pandemics.

Conference Reviewer

- Served as the reviewer for SIGIR (2023), ACL (2022), COLING (2022), EMNLP (2021).

Teaching Assistant

- Served as the teaching assistant for the course "COMP 6709: Advanced Natural Language Processing" in Spring 2023 and Spring 2024 at the Hong Kong Polytechnic University.

EXTRACURRICULAR ACTIVITIES

We Media

Dec 2020 – July 2022

- Served as the editor-in-chief of "夕小瑶科技说"(formerly known as "夕小瑶的卖萌屋"), an influential Chinese WeChat public account focused on the field of NLP.
- Led the team producing over 200 original articles, and the number of subscribers rose from 15k to 100k+.

HONORS & AWARDS

- 1st Prize for the Competition at 21st China National Conference on Computational Linguistics: Automated Medical Diagnosis Systems 2021
- Outstanding Graduate of Peking University 2020
- "Award for Research Excellent" at Peking University 2018, 2019
- 3rd Prize for the "Tencent Cup" Program Design Competition 2018

TECHNICAL SKILLS

- Language: Chinese (Native), English (Fluent)
- Standard English Test: TOEFL 111 (R: 30; L: 29; S: 27; W: 25), GRE V-156 + Q-170 + W-4.0
- Coding: Python, C/C++
- Tools: PyTorch, Tensorflow, Git, Docker, Linux, Markdown, Vim
